

EXPERIMENTAL FACILITY FOR LAYING HENS ON PRACTICAL SCALE

Technical data of the facility

Total number of animals	23,760
Number of houses	2
Number of experimental units per house	36
Number of birds per replicate pen	330
Floor area / living area (incl. aviary) (m ² /pen)	20.0 / 36.8

Standard observations

Observations per pen

- Feed intake
- Laying rate
- Egg weight
- Bird weight
- Feather score
- Egg quality
- Mortality

All performance data are reported per period of measurement

Optional to test different breeds
