

Research facilities for ducks in small floor pens

192/96 floor pens in 2 rooms

Number of pens	192	96
Floor area (m ² /pen)	2	4
Number of birds per pen	14	28
Maximum number of treatments (with 6 replicates)	32	16

144/72 floor pens in 1 room

Number of pens	144	72
Floor area (m ² /pen)	2.2	4.4
Number of birds per pen	15	30
Maximum number of treatments (with 6 replicates)	24	12

Standard observations

- Body weight gain
- Feed intake
- FCR
- Litter score
- Mortality rate

Performance data given per phase.

Optional observations

- Sampling of blood, faeces, organs etc.
- Chyme collection
- Viscosity
- Histology
- Microbial profiling
- Slaughter yield
- Economic analyses
- Other observations can be discussed

Type of studies

- Dose response studies
- Efficacy studies
- Registration studies
- Tolerance studies

48-days performance

BW (kg)	3.61
ADG (g/day)	75.2
FCR (g/g)	2.242
