

## Schothorst Feed Research

Every day, more than 80 people from Lelystad work on developing and sharing knowledge about nutrition for farm animals (cattle, poultry and pigs). SFR is the leading institute for research into optimal animal nutrition, based on animal health, the environment and quality in addition to optimal production.

In our laboratory you will join a motivated team of 10 people where cooperation is of great importance. Within SFR we attach great value to the team, we work hard but also make time for fun.

## CHEMICAL ANALYST

Our laboratory makes an important contribution to the various research projects. Here, among other things, raw materials, animal feed and animal products are analysed. This is done for our own research or on behalf of third parties. Naturally, the research meets all national and European requirements.

As a Chemical Analyst you are responsible for the correct execution of analyses. You will also regularly take samples in the animal facilities at our location, and you will collect information about the (physical) composition of the (raw) materials. All your results are analyzed by our test center, after which this data is processed by our researchers in the research. The results are conveyed to the customers by our consultants, enabling them to improve their feeding strategies worldwide. You are therefore an indispensable link in a large team!

## MAIN WORK

- Independently performing analyzes on animal feed, raw materials and samples of a biological nature (manure, meat and eggs)
- Taking samples in our animal facilities
- Sample preprocessing
- Reporting the results in Lims
- Performing Weende analyses
- Reviewing and processing analysis results and first-line control results in StarLims (validation level 1)

*You play an  
important role in  
the execution of  
our research*

# AS A CHEMICAL ANALYST YOU ALWAYS CONTINUE TO WORK ON THE INNOVATIONS WITHIN OUR SECTOR

## OUR OFFER

We offer a varied position in a motivated and close-knit team within an organization that is constantly on the move. The current challenges within livestock farming make our sector a very stimulating work environment with a lot of room for personal development.

Our working atmosphere is informal with plenty of room for own initiative. We offer employment conditions in line with the market, such as salary, days off, an end-of-year bonus and pension. In addition, each employee receives a sustainable employability budget. You can choose from a number of spending goals, including training, extra leave or a partial payment.

## JOB REQUIREMENTS

- Accurate, sober and driven
- Affinity with farm animals
- Minimum education MLO-4 analytical chemistry
- Able to work independently and in a team
- Able to work well according to a schedule, but also be able to respond flexibly

## COMPETENCIES

- Team player
- Accuracy
- Efficiency
- Involvement
- Planning/Organizing
- Stress resistant

## ARE YOU OUR NEW COLLEAGUE AT THE LAB?
